

## Health Science BS Student Learning Outcomes

---

Objective 1: Knowledge of fundamental concepts of health science.

Outcome 1.1: Students will demonstrate a comprehensive knowledge of health care policies and strategies.

Outcome 1.2: Students will demonstrate knowledge in critical issues facing allied health/public health and emergency response workers.

Objective 2: Proficiency in critical thinking skills to conduct analysis/research in the area of health science.

Outcome 2.1: Students will demonstrate competence in analytical and critical thinking skills evidenced by their ability to weigh evidence, facts, and ideas, and draw conclusions.

Objective 3: Proficiency in written and oral communications as it relates to health science.

Outcome 3.1: Students will formulate and support a thesis through accurate evidence and documentation.

Outcome 3.2: Students will research, collect, and assess scholarly information regarding their major field of study.

Outcomes 3.3: Students will present written information clearly, logically, and critically.

Outcomes 3.4: Students will create an audience-appropriate document that exhibits clarity and organization and serves the intended purpose.

Objective 4: Appreciation for ethical standards, societal, cultural, human diversity, and global differences as it relates to health science.

Outcome 4.1: Students will demonstrate an understanding of ethical issues as they relate to the practice of health science.

Outcome 4.2: Students will demonstrate an understanding of cultural, societal, and global issues as they relate to the practice of health science.

Outcome 4.3: Students will demonstrate an understanding of human diversity issues as they relate to the practice of health science.

Objective 5: Demonstrate ability to use technology effectively including that associated with the field of health science.

Outcome 5.1: Students will demonstrate proficiency in the use of technology.
