Financial Reporting

I. Policy Statement and Purpose

The University has been entrusted with public funds to fulfill its mission of education, research, and service. All University faculty and staff under the leadership of the Board of Trustees and the University administration are obligated to ensure that University funds are used only for mission-related purposes and are used in compliance with accepted financial management procedures, University policies, and state and federal requirements.

The responsibility for accurate and timely financial reporting resides with every employee who spends University funds or has financial responsibilities as part of their job. Therefore, it is imperative that such employees are familiar with and conform to financial reporting policies and procedures, including related Administrative and Financial Operating Policies, and reporting directives/procedures issued by the Office for Financial Affairs.

II. Fiscal Year

The University's fiscal year ends on September 30th. Financial Statements are prepared annually on the accrual basis of accounting.

III. Annual Audit

The independent external annual audit of the University's financial statements is performed in accordance with generally accepted auditing standards of the American Institute of Certified Public Accountants (AICPA). For federally funded grants and contracts, the independent auditor uses the Coordinated Audit Approach described in the Office of Management and Budget (OMB) Circular A-133. Audit reports and management letters are presented to the Board of Trustees.
